DETAILED ACTION

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney Jeffrey Ingalls on 07/15/2011.

The claims are amended as follows:

Claim 1 (currently amended): An organic EL device comprising an anode, a cathode, and an organic layer including a plurality of light emitting layers provided between the anode and the cathode, wherein said light emitting layers comprise a red light emitting layer provided on the anode, a green light emitting layer provided directly on the red light emitting layer, and a blue light emitting layer provided directly on the green light emitting layer wherein said blue light emitting layer comprises a positive charge transporting blue light emitting layer and a negative charge transporting blue light emitting layer and an electron transporting light emitting layer laminated in this order from the anode side.

Claim 8 (currently amended): A display comprising a color filter provided on a light take out surface side of an organic EL device for emitting white light, wherein said organic EL device comprises an organic layer including a plurality of light emitting layers, said organic layer interposed between an anode and a cathode; and said light emitting layers comprise a red light emitting layer, a green light emitting layer, and a

blue light emitting layer laminated in respective order from the anode side wherein said blue light emitting layer comprises a positive charge transporting blue light emitting layer and a negative charge transporting blue light emitting layer and an electron transporting light emitting layer laminated in this order from the anode side.

Claim 14 (currently amended) An organic EL device comprising an anode, a cathode, and an organic layer including a plurality of light emitting layers provided between the anode and the cathode, wherein said light emitting layers comprise a red light emitting layer provided on the anode, a green light emitting layer provided directly on the red light emitting layer, and a blue light emitting layer provided directly on the green light emitting layer, wherein each of said red light emitting layer and green light emitting layer is composed of a single layer, wherein said blue light emitting layer comprises a positive charge transporting blue light emitting layer and a negative charge transporting blue light emitting layer and an electron transporting light emitting layer laminated in this order from the anode side.

Claim 16 (currently amended) An organic EL device comprising an anode, a cathode, and an organic layer including a plurality of light emitting layers provided between the anode and the cathode, wherein said light emitting layers comprise a red light emitting layer provided on the anode, a green light emitting layer provided directly on the red light emitting layer, and a blue light emitting layer provided directly on the green light emitting layer, wherein said blue light emitting layer comprises a positive charge transporting blue light emitting layer and a negative charge transporting blue

light emitting layer and an electron transporting light emitting layer laminated in this order from the anode side.

Allowable Subject Matter

Claims 1 and 8-19 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 8, 14 and 16 the prior art of record fails to teach of suggest an organic EL device comprised of, in part, a red light emitting layer provided on the anode, a green light emitting layer provided directly on the red light emitting layer, and a blue light emitting layer provided directly on the green light emitting layer wherein said blue light emitting layer comprises a positive charge transporting blue light emitting layer and a negative charge transporting blue light emitting layer and an electron transporting light emitting layer laminated in this order from the anode side. Due to their dependency, claims 9-13, 15, 17, 18 and 19 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
